Cedric Labache

Senior consultant - Sioen & eigenaar Computertje
Brugge en omgeving

Samenvatting

My ideal professional career plan consists of continuous improvement. I try to always educate and re-educate myself, accepting new challenges and outgrowing my current role and limitations.

Next to a full time job (Full stack developer) I'm also a crypto enthusiast and small fish (swing) trader. Though it needs some improvement.

Whenever I have some spare time, I like spending it with my family or try to pick up an old fashioned book like 1984, Lord of the flies ... I get drawn to scientific debates such as astronomy and facts about Schrodinger's cat. Though we've had some variations, such as how to fly by teleportation.

My biggest dream is to have at least one mid-life crisis followed by me buying a Volkswagen van and traveling the world, only to reappear refreshed and sharpened, a head full of wisdom and prepared to once more pursue infinite wisdom.

Ervaring

Computertje
Freelance Software Developer
april 2024 - Present (6 maanden)
Bredene, Vlaanderen, België
